Press Release

11th August 2009

ITASCO Precision displays precision machining and Weld Cladding at Offshore Europe 2009

11th August 2009, Glenrothes, Scotland – ITASCO Precision are pleased to announce, that for the first time in its history, they will open their doors to visitors at Offshore Europe 2009.

A purpose built end connector fitting used in flexible pipe systems for the oil and gas sector has been intricately dissected for display on the ITASCO booth. As a crucial component in the umbilical assembly, any delay in manufacture can incur costs stretching into the millions. ITASCO Precision's get it right first time policy is crucial for its customers. This end fitting demonstrates ITASCO Precision's Machining and Weld Cladding capabilities, and reinforces ITASCO Precision's reputation as leading providers of high quality, bespoke, turnkey solutions.

ITASCO Precision will be on booth 1027, Offshore Europe, Aberdeen, 8- 11th September 2009.

THE END

About ITASCO Precision Ltd. (www.itasco.co.uk)

ITASCO Precision is a sub-contract engineering company based in Scotland that provides complete turn key solutions to meet the needs of the global manufacturing industry.

ITASCO Precision adopts a "Get it right first time" policy, project managing the entire manufacturing process from initial receipt of raw material, through the various stages of precision machining, weld cladding, NDT and heat treatment.

All too aware of the implications of poor quality and late deliveries, we are committed to working closely with our customers, to provide them with access to a highly disciplined infrastructure. Strict environmental controls and operating procedures (ISO9001:2008) are employed to guarantee quality and on time delivery.

Continual investment in new technology, machinery, training, and CAD programming systems, enables ITASCO Precision to professionally meet and react to demanding customer requirements.
